

## **SUSTAINABLE PROCUREMENT POLICY**

***Signature on the Saint Lawrence Group (SSLG) has been granted by the Government of Canada the Design, Construction, Financing, Operation, Maintenance and Rehabilitation of the New Champlain Bridge Corridor Project.***

***In compliance with its commitment to environmental protection and sustainable development, SSLG integrates social and environmental criteria into its procurement process, in addition to quality, design and cost criteria. In light of the diversity in products, materials and services used by the Project, the criteria that shall be applied depend on the type of purchase needed. The sustainability criteria shall be as follows:***

- ✓ Durability of product or material***
- ✓ Products and materials with recycled or reused content or designed to be easily recycled and/or reused***
- ✓ Purchase of local products, materials and services***
- ✓ Certified products, materials and services***
- ✓ Companies committed to Health and Safety practices, protection of the environment and sustainable development.***

***In addition, SSLG commits to communicate its Sustainable Procurement Policy to all employees, suppliers and contractors.***

***The success of our approach depends first and foremost on the involvement and participation of all of us.***
